LFC7400/00 RF Segment Controller GC Kit

RF Mesh is a networked controls system based on two-way wireless communication using the latest mesh network technology. The system enables individual light points to be controlled remotely and to be managed via online platforms. Lighting operators can control remotely the outdoor lighting infrastructure setting dimming levels to achieve considerable energy savings and can get real time feedback from the luminaires reducing operating and maintenance costs via accurate scheduling of on-site maintenance service tasks, while improving both the quality and reliability of outdoor lighting.
